

REPORT OF FINDINGS

Description of Goods &/ or Services: Phase III monitoring re-construction of new 35 houses (Tsunami Project) and Wells/ Tube Wells.

Client: Children Action
Rue de La Terrassiere 14
1207, Geneva
Switzerland

Place of Inspection: Seenigama, Hikkaduwa, Sri Lanka.

Dates of Inspection for Houses: 07th June 2006 to 07th March 2007

Dates of Inspection for Wells/ Tube Wells: 07th September 2007

Service Required: On-site supervision, monitoring works in progress, quality & timing of construction, allocation of houses vs. designated beneficiaries

On instructions received from Children Action, through SGS Aid Efficiency Services in Geneva, we attended at the above place of inspection in order to monitor the re-construction of new 35 houses with 14 wells & 5 tube wells.

From commencement to completion of the reconstruction process, we inspected from time to time these 35 houses. Based upon our inspection findings we confirm compliance with the specifications provided by the client.
